-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The Office has consulted the parent application to determine the effective filing date of the claimed subject matter. It appears the parent does not support the particulars presently claimed. For example, the parent does not claim the specific limitations to the head assembly. The Office has determined the effective filing date of the instant subject matter is the filing date of this application, 2/1/02.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-30 and 41-51 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Marouiss et al. (US 2001/0048899) or Powers (US 2004/0033554).

Powers teaches in the abstract a device with a movable table positioned below a vertically movable head that holds a plurality of pipettes. Paragraph [0197] teaches assembly (34) that holds pipettes(26). Powers further teaches all of the automated control means so sample are automatically processed by the device.

Art Unit: 1743

Marquiss et al. teach an integrated sample processing system that includes transport modules, fluidics control modules and analysis modules. A head with multiple pipette tips transfers the sample.

Claims 23-30 and 41-51 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kelln et al. (USP 4,764,342), Salomaa et al.(4,478,094), Carthcart et al. (USP 5,443,791).

Cathcart et al. teach robotic liquid handling device. Column 3 lines 52+ teach a pipette(33) is automatically fitted into a head and is changed for a new sample.

Kelln et al. teach an automated sample handling system that employs a plurality of pipette tips(140,142) to transfer different samples.

Salomaa et al. teach an automatic liquid transfer system that includes a horizontally translatable table and a vertically translatable set of pipettes where fresh pipette tips are picked up after each iteration to minimize contaminations..
